

Tim Ha

TimHa612@gmail.com | linkedin.com/timha612 | github.com/IAmBamboo | Canadian Citizen

Skills

Languages & Markup: JavaScript, TypeScript, C#, PHP, SQL, HTML, CSS, Bash

Frameworks & Platforms: React, Flutter, Expo, Android SDK, Firebase, Raspberry Pi (ARM)

Databases & Tools: Docker, Linux (CentOS, Debian, Pi OS), Cloudflare DNS/API, MySQL, PostgreSQL, Git, GitHub, VMware

Education

Northern Alberta Institute of Technology – Bachelor of Technology in Management

Expected Dec 2026

Northern Alberta Institute of Technology – Diploma in Digital Media & IT (Software Development)

May 2025

- GPA: 3.5 | *Notable Courses: Enterprise Application Development, Front-End Development, Android Development, Database Fundamentals, Capstone Project*

St. Clair College – Diploma in Computer Systems Technician – Networking

Sept 2021

- *Notable Courses: Networking I-IV, Intro to Database Concepts, Linux I, JavaScript I, Network Security I*

Projects

Self-Hosted HomeLab & Infrastructure

bozabu.ca

Raspberry Pi (Linux), Docker Compose, Cloudflare API, TCP/UDP Tunneling, GitHub Actions (CI/CD)

- Built and managed an ARM-based self-hosted environment for a public website and game server using Docker Compose.
- Automated DDNS with Cloudflare API to proactively maintain service availability across rotating IPv6 assignments.
- Automated IPv6 monitoring and DNS updates via Cloudflare, ensuring reliable service access and bypassing ISP CGNAT.
- Configured SRV and AAAA DNS records to enable domain access and service discovery.
- Implemented a CI/CD pipeline using GitHub Actions to auto-deploy website updates to Docker on Raspberry Pi.

Air Quality Monitoring App (Capstone)

React Native (Expo), TypeScript, Cloud Firestore

- Collaborated with a 5-person team to develop an app that provides real-time location-based air quality monitoring.
- Engineered an event-driven notification system with rate limiting to prevent repeated alerts during prolonged AQI events.
- Integrated AQI data fetching and background Expo workflows with Firebase for data validation and real-time logging.
- Built modular UI components displaying AQI levels, health insights, and survey eligibility.

Calorie Tracking App

github.com/IAmBamboo/CalorieTrackerApp

Flutter (Dart), Firebase, Cloud Firestore, OpenFoodFacts API

- Developed a cross-platform Flutter app using Firebase for authentication and Firestore to track daily calories and nutrition.
- Integrated OpenFoodFacts API to allow users to search and log items with accurate nutritional data and serving sizes.
- Implemented per-user daily logs and calorie limits in Firestore, allowing review of past logged data.

AI Chatbot Assistant (Capstone)

JavaScript, PHP, OpenAI API

- Collaborated with a 5-person team to develop a full-stack AI chatbot delivering real-time age-appropriate responses.
- Developed a multimodal pop-up interface with voice/text input and prompt engineering for tailored AI responses.
- Led technical deployment and troubleshooting, ensuring API reliability, error handling, and fulfilling all client requirements.

Work Experience

Data Entry Clerk, Central Transport – Windsor, ON

Oct 2019 – Sept 2021

- Maintained 100% data accuracy processing 30+ Bills of Lading hourly in a high-volume, deadline-driven environment.
- Streamlined digital and physical workflows while maintaining quality control.
